

Task:

Go to: <https://kartenprojektionen.de/imglist.php>.

1. Describe **one** of the world maps. Do further research on it and provide your sources.
2. Compare and contrast different projections of the world.
3. For an international project in History class you are supposed to pick one of these projections of the world as a world map: Discuss these projections of the world and come to an informed conclusion.

1. As a group, pick one projection of the world.

Name	found at:	short link
Mercator Projection	https://kartenprojektionen.de/imglist.php .	
Winkel-Triple Projection	https://kartenprojektionen.de/imglist.php .	
Gall Peters Projection	https://kartenprojektionen.de/imglist.php .	
Hobo Dyer	https://kartenprojektionen.de/imglist.php .	
map at night	https://www.nasa.gov/feature/goddard/2017/new-night-lights-maps-open-up-possible-real-time-applications	https://t1p.de/bm8p

2. Come up with criteria, in order to be able to compare and contrast the different projections of the world, for example:

critierium	projection 1	projection 2	projection 3
accuracy of depiction of countries			
depiction of <u>longitude</u> and <u>latitude</u>			
<u>proportionality</u> of countries (comparing sizes of countries)			
dissemination of particular projection			
<u>orientation</u>			
<u>centering</u>			
...			

Note down your findings in the table above or work collaboratively in cryptpad: <https://cryptpad.fr/>.

3a. Evaluate the different criteria and give reasons for your final choice. Make a plea for your world map of choice.
